EXPERIENCE

Senior Full Stack Engineer

Flycode

03/2021 - 10/2024

- As a first employee in an early-stage startup I have defined and built the MVP of the product.
- Built most of the frontend UI of the platform.
- Worked on the chrome-extension development which will enable editing your product visually without relying on developers
- Using several backend development tools like Nest.js and Prisma to build APIs to be used on the platform and implemented them to the platform.
- Since I had ownership in the frontend part so I had responsibility for developing and reviewing team members' code.
- Implemented analytics and marketing tools like segment, google tag manager, Facebook Pixel, Google Analytics, Intercom, Mixpanel, Twitter Ads, and so on Implemented consent management solution to ensure company products were GDPR-compliant.
- Implemented payment system to the platform to get paid from customers

SKILLS

- Frontend Development
- Backend Development
- Medical Technology
- SEO
- Cross-Browser Compatibility
- Site Troubleshooting
- UX & UI Design
- Hosting & Maintenance
- Digital & e-Commerce
- Strategy
- CRM & CMS Platforms
- Payment Solution
- Devops
- Docker
- CI/CD
- Blockchain

SENIOR FULL-STACK DEVELOPER

Yumpu

09/2019 - 03/2021

- Designed, developed, and modified 25+ software systems and custom components
- Developed 30+ new software solutions by analyzing system performance standards
- Analyzed systems flow, data usage, and work processes; investigated 100% of problem areas
- Integrated existing software into 13 upgraded, modified systems for higher performance
- Developed and executed 200+ test procedures for software components
- Analyzed 30+ user requirements to derive technical software design and performance requirements
- Planned, tracked, and managed deliverables on 200+ short-term sprints and 50+ long-term deployments

FULL-STACK DEVELOPER

Designveloper

04/2016 - 09/2019

- Configured Webpack and babel to integrate with imported frameworks & libraries such as AntDesign, Jest, Visx, React, Electron to maintain optimal bundle size
- Employed Jest with Enzyme for unit testing of React Components and data parsing algorithm to ensure components and parser perform as expected by using structured assertions to prevent unwanted side-effects thereby guaranteeing codebase integrity and maintaining application performance consistency

JUNIOR/INTERMEDIATE FRONT END DEVELOPER

BetaKit

08/2015 - 03/2016

- Translated designs and wireframes into high-quality code using HTML, CSS, and JavaScript.
- Worked closely with developers, designers, copywriters, and other cross-functional teams (CRO, Video, Marketing, etc..) to drive innovation and maximize conversions by 40%.
- Provided input to leaders 3 times a year about the future development of new features.
- Ensured the technical feasibility of UI /UX designs.
